| Total population being covered against target: | Allocated Target of FSWs 900 while 985 are active as of now. However, 1052 FSWs were ever registered by the TI. |
| Dates of Visit: | 27 th April 2016 to 28 th April 2016 |
| Place of Visit: | Parbhani (Maharashtra) |

Overall Rating based programme delivery score:

| Total Score Obtained (in %) | Category | Rating | Recommendations |
|------------------------------------|-----------------|---------------|--|
| 90.9% | A | Very Good | Recommended for continuation with specific focus for developing learning sites |

Specific Recommendations:

- TI has identified potential stakeholders and doing required advocacies (need-based/regular). Despite of having done these advocacies, they were identified as stakeholder only if supporting (i.e. positive ones). TI could have been identified and analyzed stakeholders of others natures for doing prioritized advocacies as there was gesture of crises (in available Form-K).
- PEs' age to be considered as per norm whilst selecting them for the TI.
- CD4 count of a few of the +ves are due to be happen which required immediate attention.
- Written feed-backs/two-way communication essentially taken in practice both for horizontal/vertical positions but there was still scope for certain improvements through proper specific-elaborations;
- Defined framework of regular coordination meetings to be developed with available linkages/district health administration.
- Timely fund releases to be ensured at the end of SACS.

- Since TI is collectivizing its project-audiences and as of now certain SHGs getting transformed into CBOs and if required mentoring/strengthening is to be done community could own the project. Also there were incidences when some of the PEs (even HRGs) called by HIV/AIDS agencies of repute, as resource.
