Ministry of Health and Family Welfare

Strategic Information Management System

(Data Analysis, Computer Use & Reporting)

Blood Bank

Teaching Aims

You will learn about the data analysis, computer use and the reporting procedures of blood bank and in detail about the SIMS

CONTENTS

- Introduction to SIMS
- How SIMS differs from CMIS?
- Conceptualization of Reporting Unit Levels in SIMS
- Scheme of Data Flow in SIMS
- Online MIS Report Entry Demo

Contents (contd...)

- Starting SIMS application
- Filling periodic MIS reports Online/Offline
- Modifying, viewing, validating, forwarding reports
- Adding, viewing comments/remarks with the reports regarding data
- Viewing comments over the reports reset by DAPCU
- Changing password

SIMS

- SIMS = Strategic Information Management System
- It is internet based tool (software) to manage the entire data system of NACO
- SIMS is a single tool, where data can be entered, monitored, analyzed and reports can be generated
- It has provision for offline data entry using MS-Excel

How SIMS differs from CMIS?

- SIMS launched in August 2010

Sr. No	SIMS	CMIS
1	Internet based tool – computer needed for data submission at all levels. Provision for both online and offline submission	Submission by primary reporting unit to DAPCU is in hard copy format
2	Once data is forwarded by the primary reporting unit, all subsequent higher levels can view the data in real time	Not possible in CMIS
3	Serves multiple users. It has a software system whereby data from different components can be integrated.	Different software for different components
4	Ensures quality data check at all levels	Quality check possible only at primary reporting unit.
5	Different statistical packages can be used	Cannot be used

- It is a single internet based software
 - Other data entry sources like individual data entry systems of ICTC, ART are integrated
- Data entry, monitoring of entries, analysis of the data entered, and customized reports generation can be done through this system
- Once data is entered at the reporting level, all subsequent higher levels can view the data in real time.

SIMS Modules

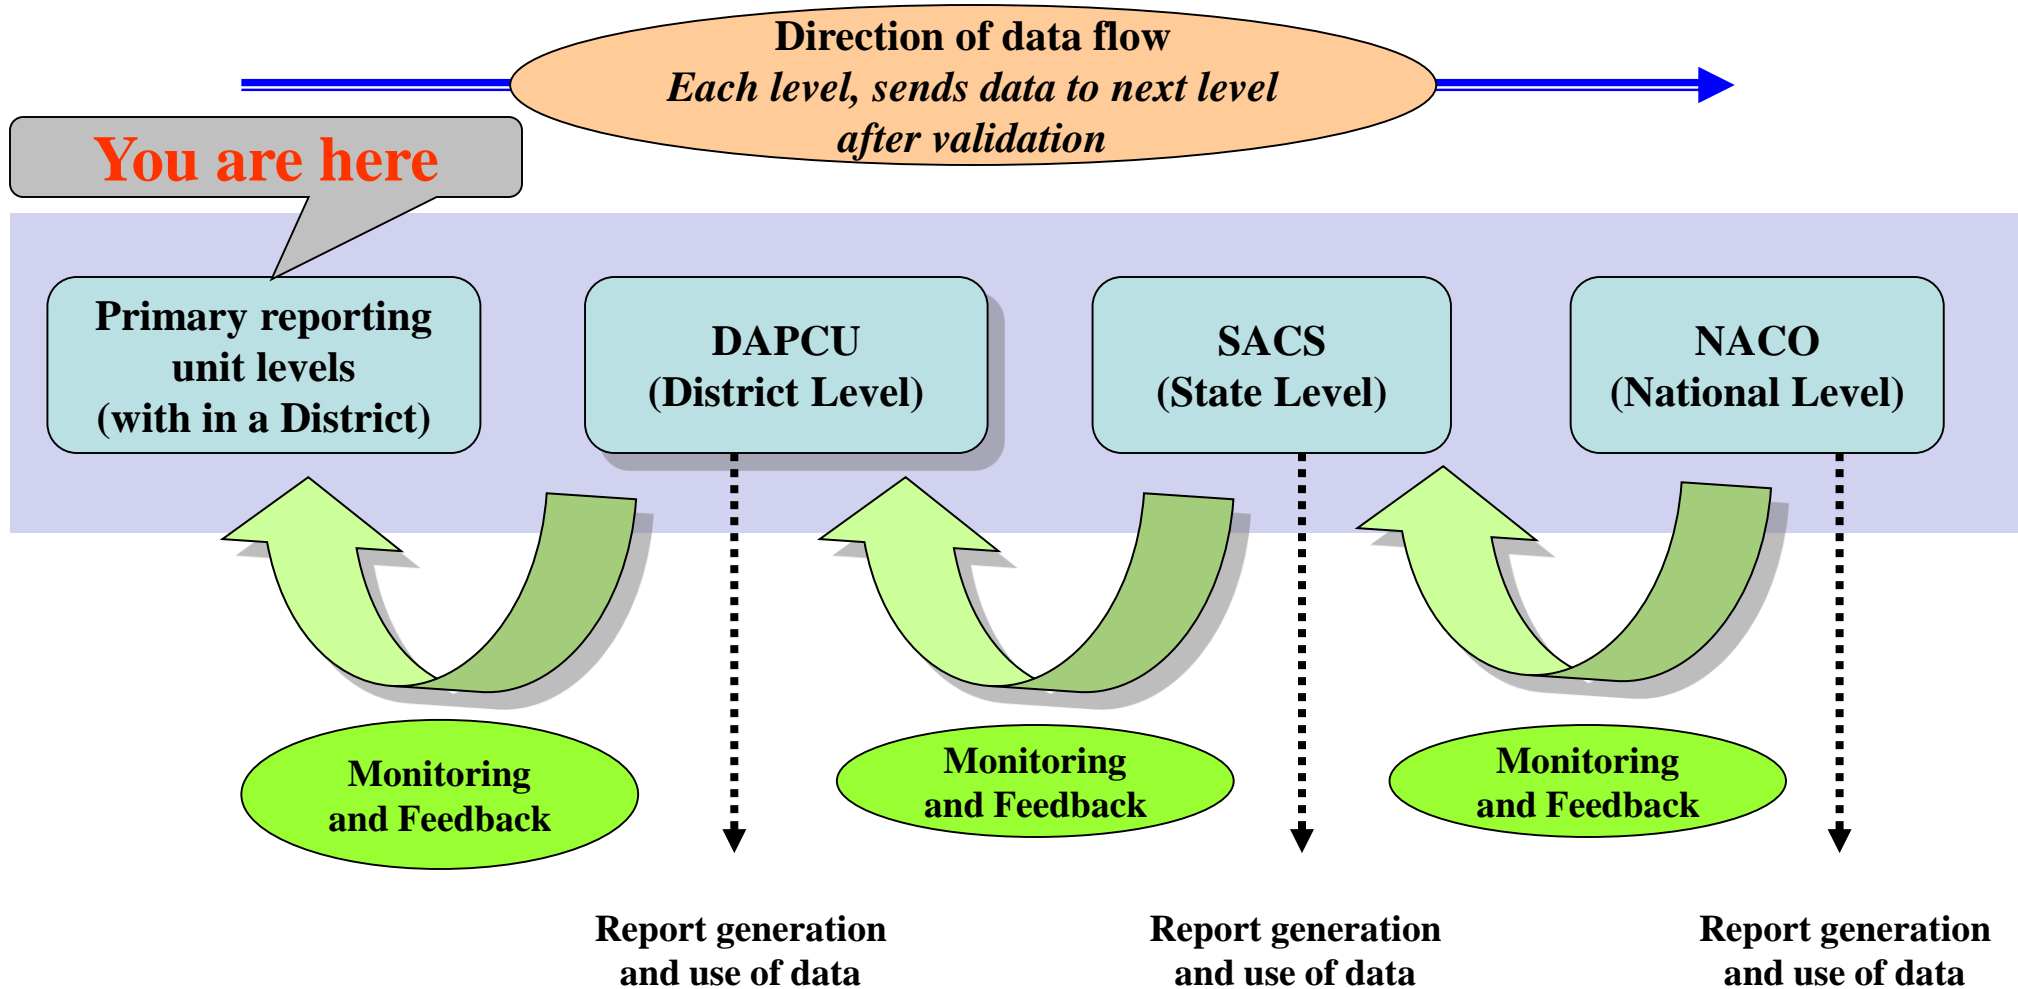

- SIMS has three modules
 - Admin
 - Reports
 - MIS

- MIS Module
 - MIS stands for Management Information System
 - It includes the periodic reports filled by reporting unit
 - This module is used for entering the data in respective format reports
 - It is also used to view, modify and forward the data

Conceptualization of Reporting Unit Levels in SIMS

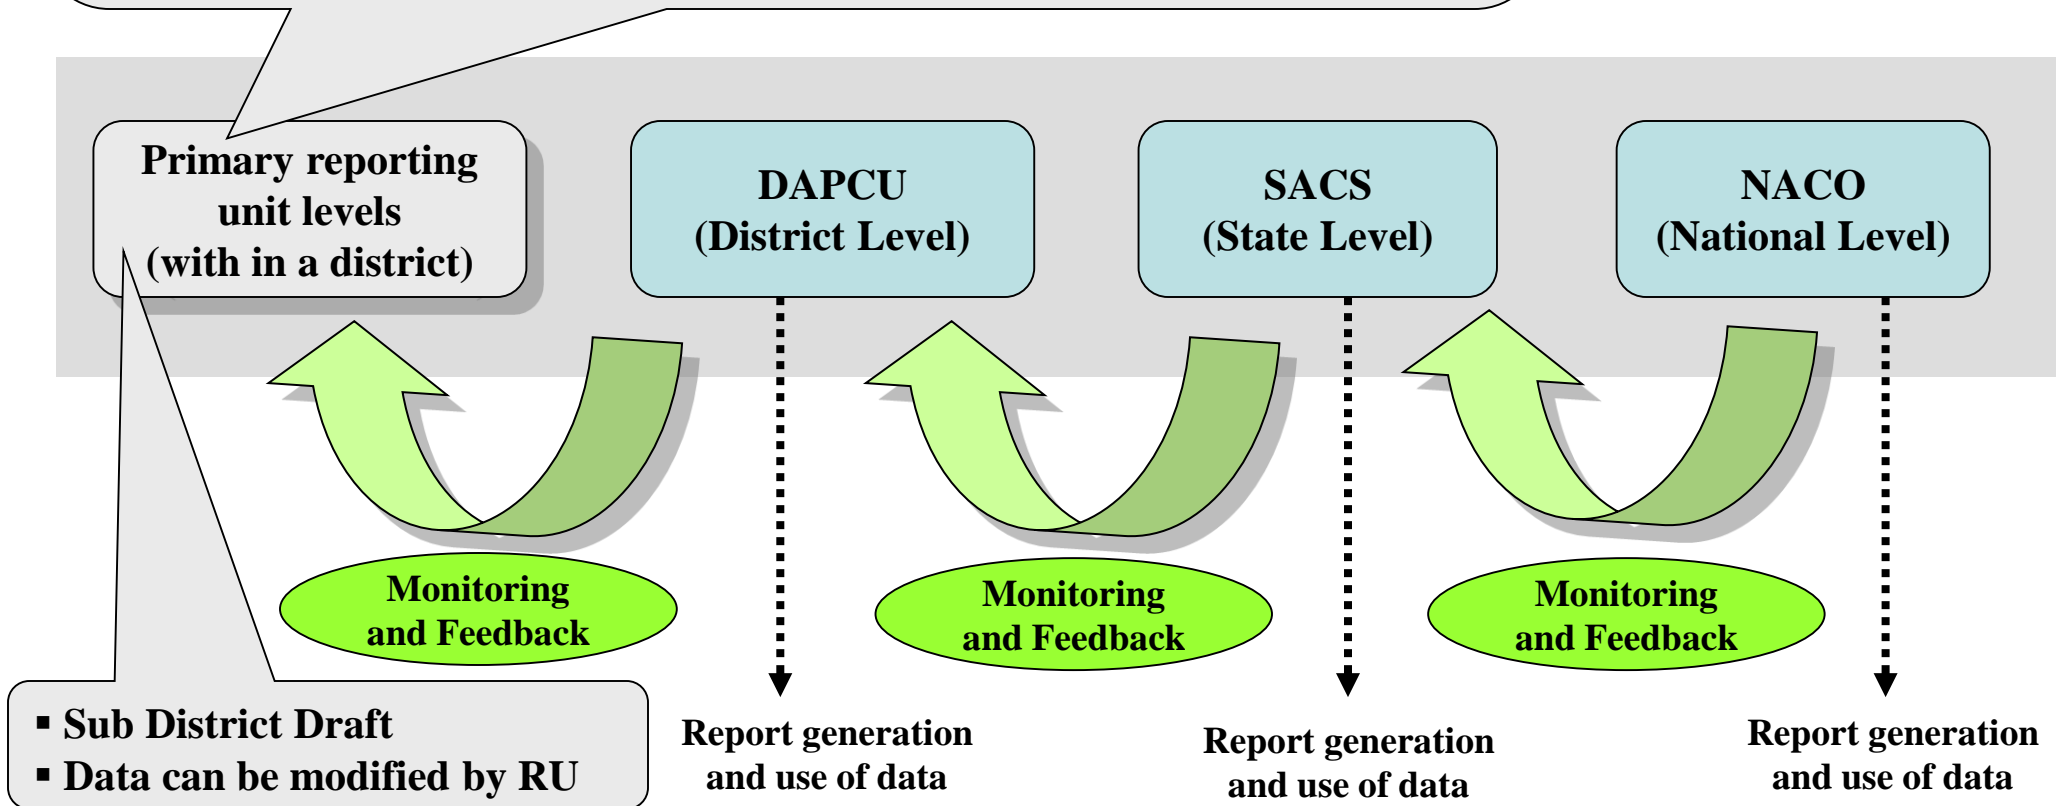

Reporting Unit Level	Reporting Unit Type
State	SACS
District	DAPCU (District AIDS prevention & Control Units)
With in District	ICTC, Blood Bank, ART, DIC, STI, TI, SLART, RSTRL, Link worker, Laboratory

Data Flow in SIMS

Data Flow in SIMS

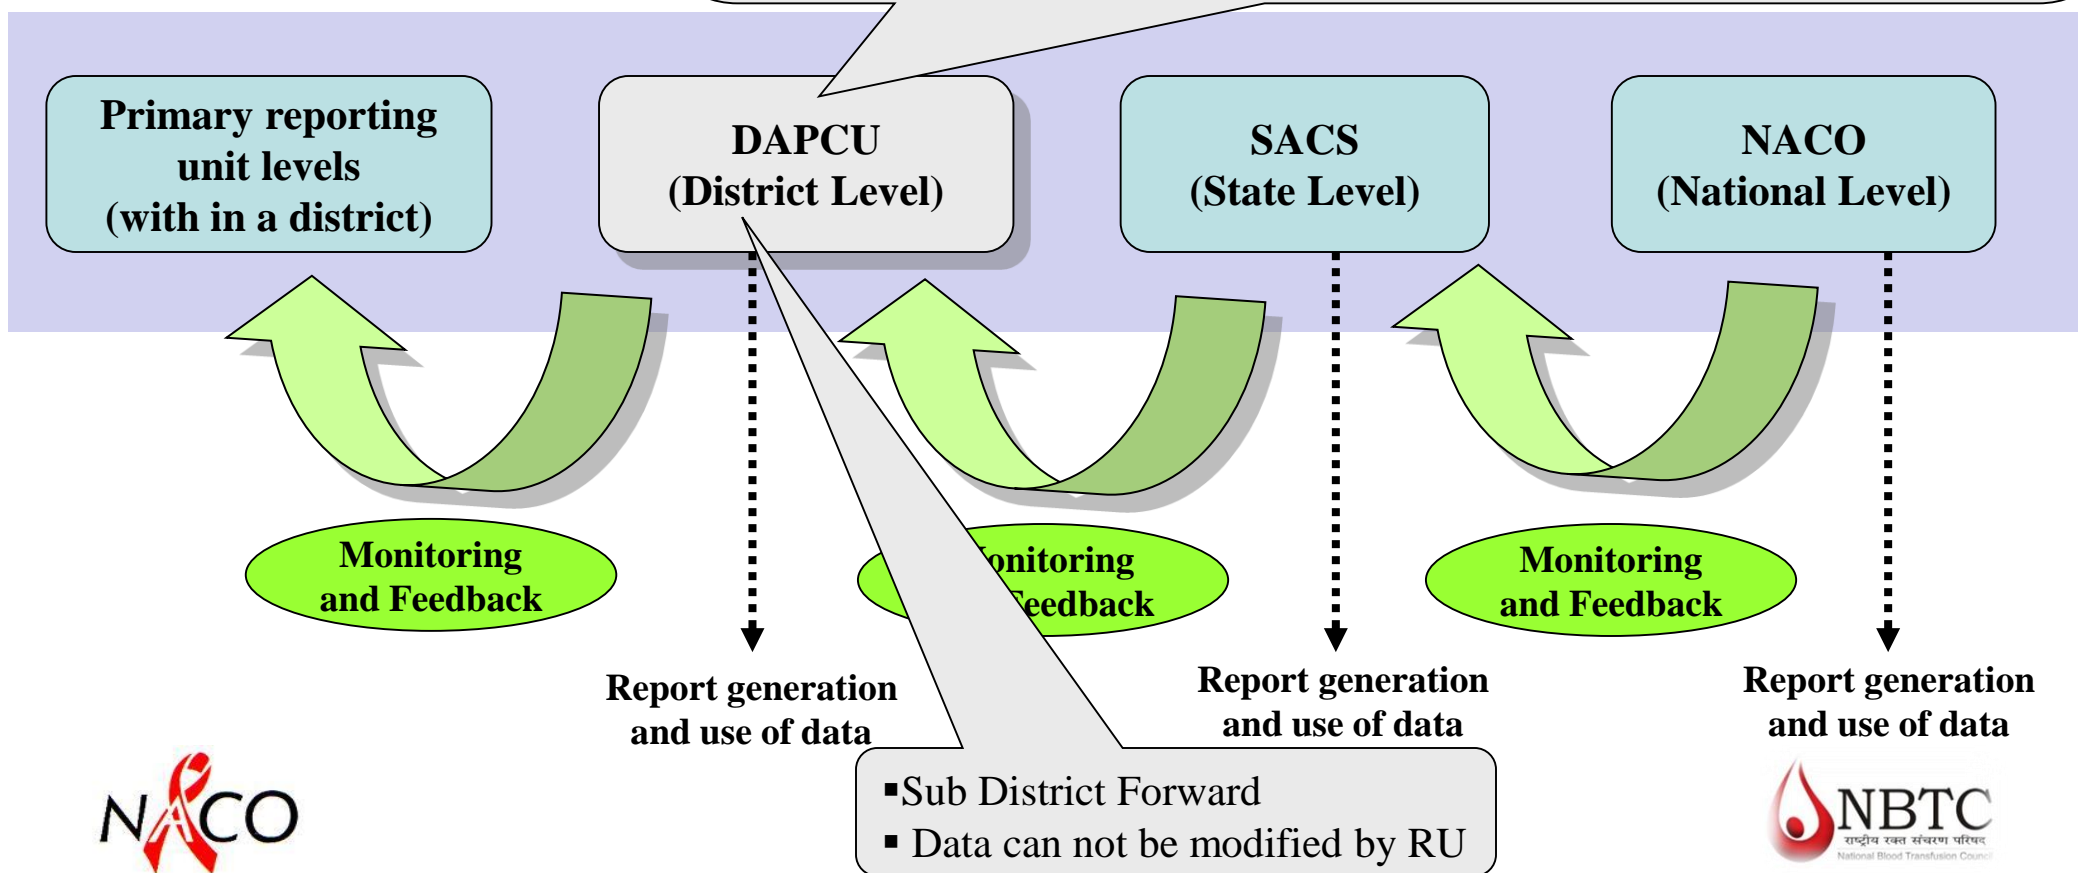

- You enter Data at the primary reporting units at Sub-District level
 - Individual (ICTC/ART)
 - Monthly (STI/BB/TI etc)
- Your entered data is validated at the reporting unit
- You forward the Data to DAPCU

Data Flow in SIMS

At the DAPCU level:

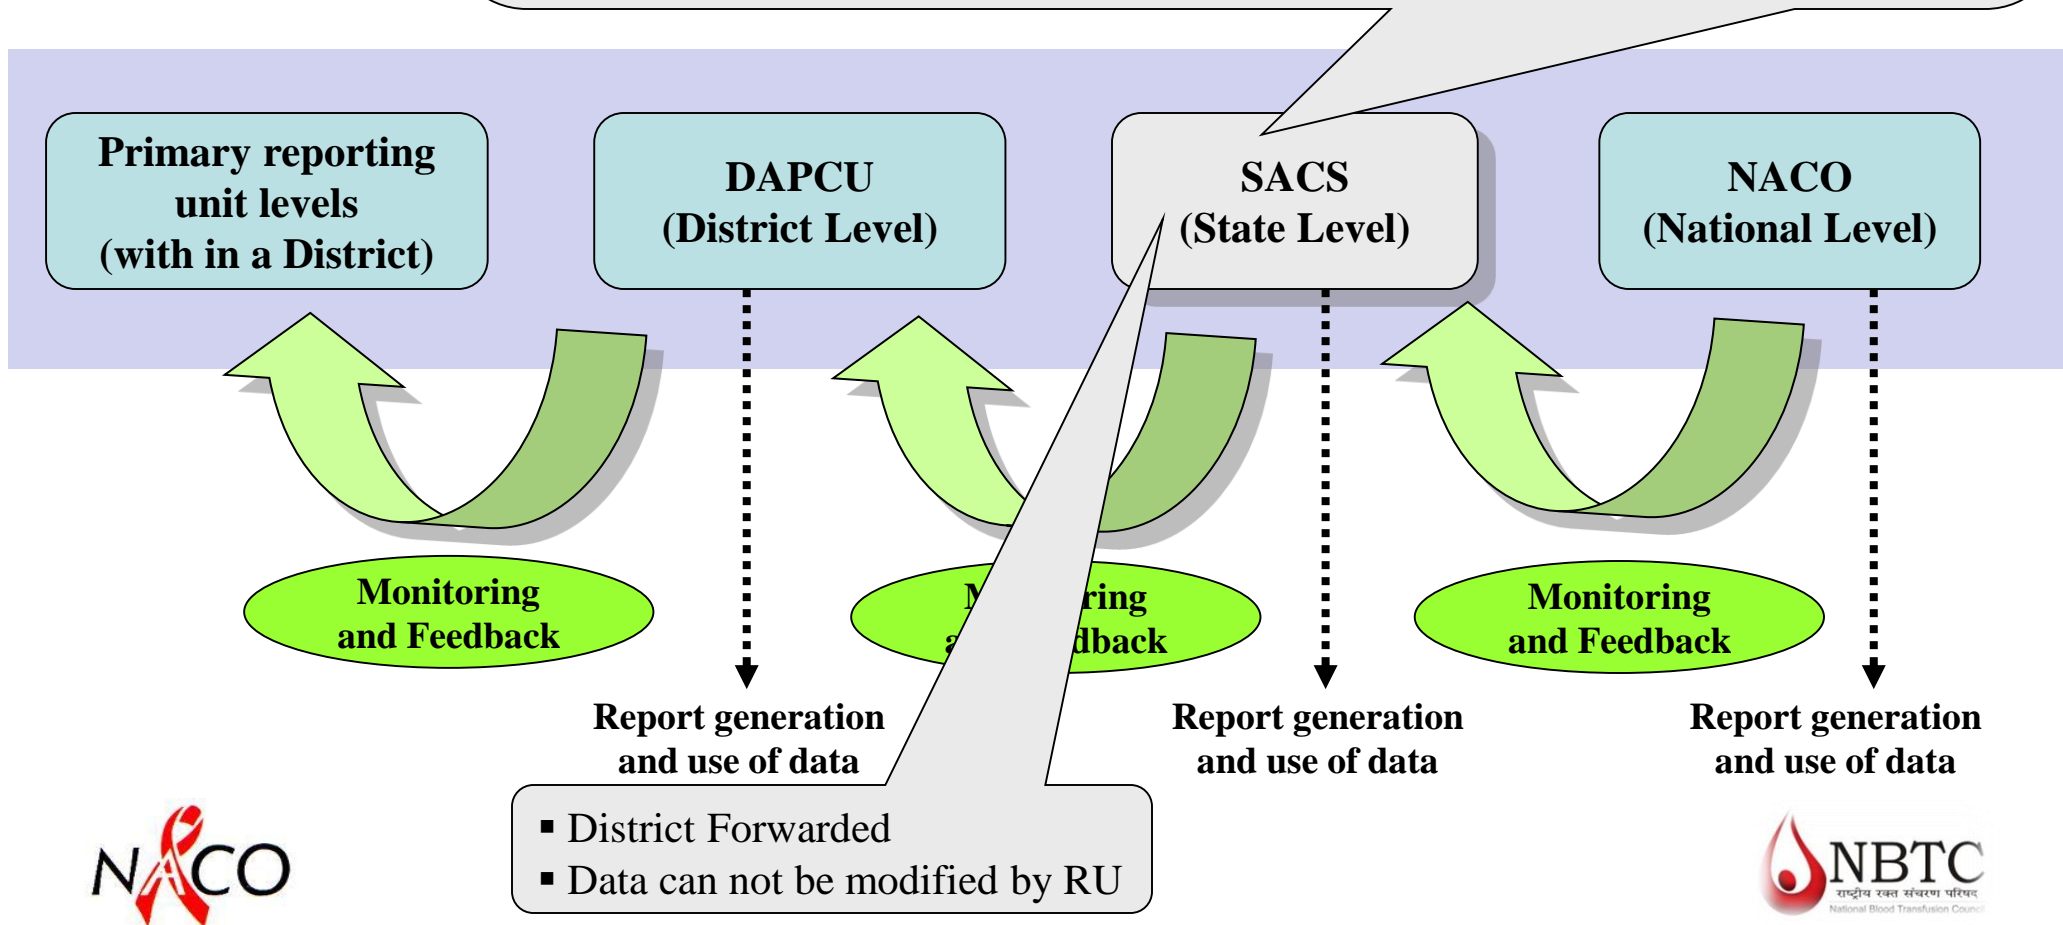

- DAPCU receive the data sent by primary reporting units
- DAPCU would scrutinize the data for:
 - Completeness of reporting
 - Correctness of reporting
- After validation DAPCU would send (forward) the data to next level (SACS)
- If DAPCU found errors/ incomplete data/ or queries, that would resend the data to you at reporting unit level, ask you to validate and send it back to DAPCU after validation.

Data Flow in SIMS

At the SACS level:

- SACS receive the data sent by DAPCU
- They would once again scrutinize the data sent by DAPCU at the state level and might resend the data to DAPCU for validation if any errors / queries arise
- When DAPCU receive a data sent back from SACS, DAPCU would need to revalidate the data in consultation with You (primary reporting units) validate and send (forward) the data to (SACS)

Online MIS Report Entry Demo

The methods for entering data in SIMS online:

- Data entry in the Online Reporting format
- How to Modify, View and Validate Data
- How to Add, View Comments with the reports regarding data

Selecting Report From MIS Menu

The screenshot displays a web application interface. At the top, a navigation bar contains the text "MIS" with a right-pointing arrow. Below this, a sub-menu is visible with the text "Blood Bank" followed by a right-pointing arrow, and two options: "Blood Bank Monthly" (highlighted in red) and "Blood Bank Quarterly". To the right of the navigation bar, there are links for "Download Format", "Change Password", "Remote Support", and "LogOut". On the left side of the main content area, there is a text prompt: "Click on the link in Menu Header to". In the center of the page, the text "Welcome to Strategic Information Management System" is displayed in a purple, italicized font. Below this, the copyright notice "Copyright © NACO 2009 . All rights reserved." is visible. At the bottom of the page, there is a status bar with a JavaScript URL and a "Local intranet" icon.

Modifying Saved MIS Report

- You have entered and saved a particular data
- But, you have not yet sent that data to the next level
- If you want to modify some data in the format that is already saved (*but not sent yet*), how would you do that? Next few slides, explain that
- Remember, you can modify only that data which has not been sent (*forwarded*) yet by you to the next level. the data that is already forwarded can not be modified.
- A forwarded data can be modified only if the next higher level, resets the data back to you for correction

Hands On training on

- Monthly and Quarterly Report Entry
- Modifying, viewing and validating reports
- Adding, viewing comments/remarks with the reports regarding data

Ensuring the completeness of the data to be forwarded

- Generate verify report to see which fields in the format have been kept blank (Blanks are marked by a code), it also shows the validation errors.
- Fill the missing values in the format by modifying it.
- Check for the validation errors by cross verifying the indicators value.
- After verifying becomes
- Now report can  forwarded

Offline Data Entry

- Offline data entry facility has been provided for the Reporting Units those have poor or no internet connectivity.
- The data can be entered into the excel format that is similar to online format, saved as XML file and uploaded on SIMS website
- Next few slides would describe how to download an offline format, enter data and upload it

Steps for Offline Data Entry

Centres having Poor Connectivity	Centres having no Connectivity
<ol style="list-style-type: none"> 1. Download the Offline Excel format from Download Offline link in your login (<i>show link</i>) 2. Open the excel file and fill the report's data in excel file. 3. Save the excel file in XML format 4. Login into the SIMS website 5. Select the link of offline Data Entry above the Sub Section Page. 6. Select the saved XML file from local computer 7. Click the Upload button to save the data of XML file in the online SIMS report. 8. The report in which data is uploaded still in draft mode so report has to be verified and forwarded separately 	<ol style="list-style-type: none"> 1. Ask for the offline excel format file from DAPCU or SACS. 2. Open the excel file and fill the report's data in excel file. 3. Save the excel file in XML format on pen drive or CD. 4. Login into the SIMS website 5. Select the link of offline Data Entry above the Sub Section Page. 6. Select the saved XML file from pen drive or CD 7. Click the Upload button to save the data of XML file in the online SIMS report. 8. The report in which data is uploaded still in draft mode so report has to be verified and forwarded separately

Learning Outcome

Enabled knowledge about the data analysis, computer use and the reporting procedures of blood bank and in detail about the SIMS
